Susan,

I wanted to check to see that you had received the environmental reports pulled together by Epic. Let me know if there is anything else I can provide as I am interested in getting this process moving forward. I am sure Alan would like the headache gone.

One of the things I am unsure of is the status of your clean up. It seemed to me that there were a few things still not finished. Maybe some drums still there or a review still needed for possible contamination under the building's concrete floor. I forget, it has been a while since I have reviewed this one, so please let me know what is left on my end and yours.

Thanks.

BC
